

FLOW CONTROL PRO SERIES

*Simply set and forget –
protects your system*

The Aqua-Quip Flow Control Pro Series eliminates the possibility of the booster pump running dry of water as a result of incorrect synchronisation with the pool pump.

Relax... your pool has never looked more inviting!

AQUA QUIP

FLOW CONTROL PRO SERIES

simply set and forget to avoid the risk of costly repairs

Supplied complete with integrated flow switch.

Aqua-Quip Flow Control Pro Series is designed to give you complete automatic control of your booster-driven pool cleaning system.

The in-built delay timer provides power to the booster pump for a user-specified amount of time, 10 seconds after constant water flow is detected in the pipework. When water flow stops or is significantly reduced, the integrated flow switch shuts down the booster pump and will only re-start when water flow resumes.

A new feature is the Clock Function which allows the user to select a specific run time for the booster pump. This provides compatibility with 3-speed and variable speed pool pumps.

The Aqua-Quip Flow Control Pro Series eliminates the possibility of the booster pump running dry of water as a result of incorrect synchronisation with the pool pump.

Reduces wear and tear on the pool cleaner and saves expensive pump repairs.

Saves power consumption by limiting the operating hours of the booster pump.

The Aqua-Quip Flow Control Pro Series can be used for a variety of applications where water flow is required to switch on an auxiliary electrical device.

The Aqua-Quip Flow Control Pro Series with its integrated flow switch is significantly more reliable and much simpler than installing two separate time clocks.

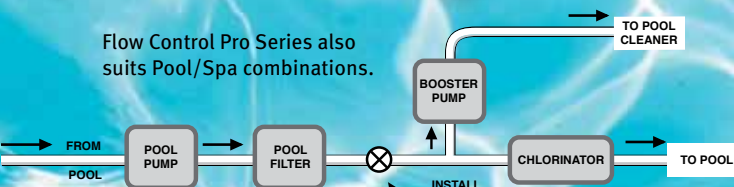

Aqua-Quip's 2 year warranty provides the user ultimate peace of mind.

Socket for Booster Pump

Connect to power point

Flow Control Pro Series also suits Pool/Spa combinations.
