- **Proven reliability.**

MANUFACTURED BY

AQUA QUIP[™]

Australian Made Excellence

Jet-Vac Pool Cleaner

for a guaranteed spotless pool

Jet-Vac keeps your pool looking pristine.

There's virtually nothing this cleaner can't swallow.

The huge 115mm throat picks up twigs, large leaves, dirt, even golf balls and goggles! Large capacity bag compacts up to 3.5 litres of rubbish.

Jet-Vac features forward/reverse cycles to ensure complete pool coverage on any surface without getting stuck in corners. Propulsion and cleaning is achieved purely by jets of water. Wheels are free spinning and are not connected to turbines, drive belts or gears. Jet-Vac requires a dedicated plumbing line and is powered by the Aqua-Quip booster pump.

Install Jet-Vac, the fully automatic pool cleaner most suited to Australian conditions that sets industry standards for speed, quality and efficiency.

Optimise the performance of your Jet-Vac by installing the Aqua-Quip Flow Control Timer as an optional extra.

The Flow Control Timer ensures the Jet-Vac booster pump synchronises with the pool pump, saving energy costs and preventing the risk of costly pump repairs. No maintenance required, simply set and forget.
