

FLOW CONTROL

Pro Plus Timer

The Aqua-Quip Flow Control Pro Plus Timer eliminates the possibility of the booster pump running dry of water as a result of incorrect synchronisation with the pool pump.

The Flow Control Pro Plus Timer incorporates a robust flow switch sensor that only provides power to the booster pump when constant water flow is detected in the filtration system.

- Reduces wear and tear on the pool cleaner and saves expensive pump repairs.
- Set-and-forget timer functions with manual options available.
- Compatible with all pool pump types such as single speed, multi speed and variable speed.
- Can also be used for a variety of applications where water flow is required to switch on an auxiliary electrical device.
